As a cab driver,I depend on XM radios weather and traffic updates CONSTANTLY to keep my cab moving,being that I drive NY's capital district and drive MANY politicians from the airport to downtown Albany,the trip that XM sattelite radio may shave 15-20 minutes (as well as waiting time) may just be YOURS,not to mention the non stop entertainment that shuts up drunks and keeps them from becoming rowdy...my own personal electronic babysitter.Ive heard the commercials FM radio has been playing against XM radio...what a crock...I personally think XM should sue for false advertising.Dont mess with my XM radio.This is a new technology that the old fashioned NAB is afraid of like when cable TV came out,etc.Thanks for your time-John Kowalski
